

INCIDENT MANAGEMENT SITUATION REPORT
THURSDAY, JUNE 22, 2006 – 0530 MDT
NATIONAL PREPAREDNESS LEVEL 3

CURRENT SITUATION:

Initial attack activity was light nationally with 125 new fires reported. Four new large fires (*) were reported, three in the Southern Area and one in the Western Great Basin Area. Four large fires were contained, two in the Eastern Great Basin Area and one each in the Southern and Western Great Basin Areas. Very high to extreme fire indices were reported in Arizona, California, Montana, Utah, Colorado, Kansas, Nebraska, New Mexico, Nevada, North Dakota, Texas and Wyoming.

SOUTHWEST AREA INCIDENTS/LARGE FIRES:

BRINS, Coconino National Forest. A Type 1 Incident Management Team (Broyles) is assigned. This fire is two miles northeast of Sedona, AZ in brush, chaparral and timber. Steep inaccessible terrain is impeding containment efforts. Numerous residences remain threatened and evacuations are still in effect for Oak Creek Canyon. Highway 89A remains closed. Indirect fireline construction is planned on the north and west flanks. Extreme fire behavior with rapid upslope runs and spotting in excess of one quarter mile were observed.

RIVERA MESA, Las Vegas District, New Mexico State Forestry. A Type 2 Incident Management Team (Lineback) is assigned. This fire is five miles north of Ocate, NM in timber, grass, ponderosa pine and scrub oak. Numerous structures, power lines, rangeland and Philmont Scout Ranch are threatened. County Road 21 is closed and State Highway 21 is now open. Active backing fire with short runs and group torching was reported.

BEAR, Gila National Forest. A Type 1 Incident Management Team (Dietrich) is assigned. This fire is 15 miles northeast of Glenwood, NM in mixed conifer. Numerous residences, wildlife habitat and historical cabins are threatened. Continuous dense stands of timber and accumulations of extremely dry fuels are hampering containment efforts. Erratic fire behavior with crowning and large runs were reported.

RESERVE COMPLEX, Gila National Forest. A Type 1 Incident Management Team (Whitney) is assigned. This complex, comprised of the Wilson and Martinez fires, is located near Reserve, NM in ponderosa pine, pinyon pine, juniper and grass. Hot, dry conditions, difficult terrain and limited access continue to impede containment efforts. The Wilson fire had minimal fire activity while the Martinez fire reported spotting, torching and extreme fire behavior.

WARM, Kaibab National Forest. A Fire Use Management Team (Hahnenburg) is assigned. This lightning-caused Wildland Fire Use (WFU) incident is being managed to accomplish resource objectives. The fire is burning three miles south of Jacob Lake, AZ in ponderosa pine litter. Possible rapid fire growth from extremely dry fuels and terrain influence is a concern. Smoke continues to impact Highway 67.

SKATES, Gila National Forest. A Type 2 Incident Management Team (Philbin) is assigned. This fire is 12 miles northeast of Silver City, NM in timber. Numerous residences remain threatened. Smoldering with occasional interior torching was reported.

BEAVERHEAD, Apache-Sitgreaves National Forest. This fire is 15 miles south of Alpine, AZ in timber. The power company completed restoration of utility infrastructure. Mopup and rehab is in progress. Moderate to low fire behavior was reported.

POTATO COMPLEX, Apache-Sitgreaves National Forest. This complex is ten miles northwest of Heber-Overgaard, AZ in pinyon pine, juniper and grass. Patrol and mopup are continuing.

BURNT, Cimarron District, New Mexico State Forestry. This fire is 12 miles northeast of Cimarron, NM in pinyon pine, ponderosa pine and brush. Timber, watershed, a wildlife habitat area and utility infrastructure remain threatened. Difficult terrain is impeding containment efforts.

NAVAJO MOUNTAIN 1, Navajo Regional Office, Bureau of Indian Affairs. This fire is northeast of Page, AZ in timber, pinyon pine and juniper. No new information was reported.

SOUTHERN AREA INCIDENTS/LARGE FIRES:

GLASS MOUNTAIN COMPLEX, Texas Forest Service. A Type 2 Incident Management Team (Hannemann) is assigned. This Team is also managing the Toenail Trail, West Tank, Hwy 349, Blue Canyon and Robbers Roost fires. This complex is 15 miles northwest of Marathon, TX in grass, brush and timber. Steep terrain and difficult access are hampering containment efforts. Active fire behavior with spotting, group torching and crowning were reported.

HWY 349, Texas Forest Service. This fire is nine miles north of Midland, TX in grass and mesquite. A private airport, ranch and an oil field remain threatened. Active fire behavior with flame lengths up to eight feet was reported. The reduction in acreage is due to more accurate mapping.

DEERFLY, Florida Division of Forestry. This fire is 14 miles northwest of Coral Springs, FL in pine and grass. Spotting distances up to one-quarter mile were reported.

SCOTTS FERRY, Florida Division of Forestry. This fire is 20 miles northeast of Panama City, FL in southern rough. Rapid rates of spread and spotting up to one-quarter mile were observed.

HORSE, Oklahoma Division of Forestry. This fire is six miles northeast of Braggs, OK in hardwood litter. A slow rate of spread with single tree torching was observed.

ROCKY MOUNTAIN AREA INCIDENTS/LARGE FIRES:

MATO VEGA, Costilla County. A Type 2 Incident Management Team (Blume) is assigned. This fire is 12 miles northeast of Fort Garland, CO in timber, logging slash and grass. Numerous residences, an FAA communication site and commercial resources remain threatened. Highway 160 remains closed and evacuations are still in effect. Short range spotting with active upslope runs was reported.

ISABELLE, Southern Medicine Bow National Forest. A Type 2 Incident Management Team (Mullenix) is assigned. This fire is 25 miles southwest of Laramie, WY in timber, sage and grass. Numerous residences, ranches, agricultural lands and the city of Cheyenne watershed are threatened. Structure protection is in place. Poor access is hampering containment efforts. Erratic fire behavior along with short runs and group torching was observed.

EASTERN GREAT BASIN AREA INCIDENTS/LARGE FIRES:

LION CREEK, Manti-Lasal National Forest. A Type 2 Incident Management Team (Thomas) is assigned. This fire is five miles northwest of Paradox, CO in ponderosa pine, pinyon pine, brush and grass. Structure protection is in place for Paradox. Buckeye Campground and powerlines to Paradox are threatened. Buckeye Campground remains closed. Running and torching were observed.

HWY 46 MM 7, Twin Falls District, Bureau of Land Management. This fire is six miles north of Wendell, ID in grass and sagebrush. Smoldering fire behavior was reported. Gusty winds and low fuel moistures are impeding containment efforts.

SLD – Salt Lake Field Office, Bureau of Land Management

SOUTHERN CALIFORNIA AREA INCIDENTS/LARGE FIRES:

PERKINS, Los Padres National Forest. A Transfer of command to a Type 1 Incident Management Team (Feser) will begin today. This fire is south of Cuyama, CA in brush and grass. Southeast movement towards the San Rafeal Wilderness is projected. Rocky, rugged terrain and gusty winds are impeding containment efforts. Extreme behavior with rapid rates of spread to the south and southeast were reported.

INCIDENT NAME	ST	UNIT	SIZE	% CTN	EST CTN	TOTL PERS	CRW	ENG	HELI	STRC LOST	\$\$\$ CTD	ORIGIN OWN

ALASKA AREA INCIDENTS/LARGE FIRES:

PARKS HWY, Fairbanks Area Forestry, Alaska Division of Forestry. A Type 2 Incident Management Team (Kurth) is assigned. This fire is one mile southeast of Nenana, AK in black spruce, tundra and grass. Numerous residences, native allotments, recreational cabins, commercial property and utility infrastructure remain threatened. Acreage increase is partially due to burnout operations. Smoldering and creeping were reported.

NAGEETHLUK RIVER, Galena District, Bureau of Land Management. This fire is west of Anvik, AK in black spruce and tundra. No new information was reported. This will be the last report unless new information is received.

ELD – Ely Field Office, Bureau of Land Management

OUTLOOK:

Red Flag Warnings: In effect through Thursday afternoon for the northern Sacramento Valley and nearby foothills for strong gusty winds and low humidity.

Weather Discussion: Hotter and drier weather is on tap for most of west, as a high pressure ridge builds over the area. A west to northwest wind will prevail over the Pacific Northwest and Northern Rockies. In the Southwest and Colorado, some dry thunderstorms are expected west of the Continental Divide with more moisture east of the Divide. In Alaska, scattered showers and thundershowers are expected in the interior.

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
<p>Southwest Area Mostly sunny, hot and dry across much of Arizona. Partly cloudy with isolated to widely scattered dry thunderstorms parts of eastern Arizona into western New Mexico. Scattered wet thunderstorms eastern New Mexico and west Texas.</p>	90 to near 110 lower elevations. 70 to 90 mountains.	5% to 18% most areas, except 18% to 30% eastern New Mexico and west Texas.	West to northwest 5 to 15 mph with gusts to 25 mph across Arizona and western New Mexico. Becoming south to southeast 10 to 20 mph and gusty eastern New Mexico and west Texas.
<p>Rocky Mountain Area Scattered thunderstorms over eastern Colorado and Kansas.</p>	Highs 70 to 85 55 to 65 mountains.	15 to 25% lower elevations extreme western Colorado and western Wyoming, otherwise greater than 35% elsewhere.	North to east 5 to 15 mph eastern Colorado and Kansas. West to northwest 5 to 15 mph west of the Divide.
<p>Eastern Great Basin Area Idaho, Bridger-Teton: Mostly sunny. Northern Utah: Sunny. Southern Utah, Arizona Strip: Sunny.</p>	Idaho, Bridger-Teton: 66 to 75 mountains, 75 to 88 valleys. Northern Utah: 71 to 85 mountains, 85 to 98 valleys, Southern Utah, Arizona Strip: 75 to 90 mountains, 90 to 103 valleys. 103 to 116 low deserts.	Idaho, Bridger-Teton: 25 to 45% mountains, 12 to 25% valleys. Northern Utah: 15 to 25% mountains, 8 to 15% valleys. Southern Utah, Arizona Strip: 10 to 18% mountains, 3 to 12% valleys.	Idaho, Bridger-Teton: Northwest to west 5 to 10 mph.. Northern Utah: Upslope/upvalley 5 to 10 mph. West 10 to 20 mph ridgetops. Southern Utah, AZ Strip: Upslope/upvalley 5 to 10 mph. West 10 to 20 mph ridgetops.
<p>Southern California Area Morning fog along the coast, otherwise sunny.</p>	80 to 95 mountains. 90 to 105 valleys. 100 to 105 upper deserts. 105 to 115 lower deserts.	20 to 35% coastal areas. 15 to 30% valleys. 10 to 20% mountains. 5 to 15% deserts.	Northwest to northeast 5 to 15 mph.
<p>Alaska Area Partly to mostly cloudy with scattered showers across the state. Chance of thunderstorms in the eastern interior. Rain in south central.</p>	50s in the west to 60s and 70s in the eastern interior.	25 to 40% in the interior. Above 40% in the south and southwest.	South to southwest winds 10 to 15 mph

Geographic Area Weather	High Temperatures	Minimum Relative Humidity	Wind
Western Great Basin Area Mostly sunny.	N. valleys: 83 to 95. S. valleys: 94 to 116. N. mountains: 75 to 85. S. mountains: 81 to 91.	N. valleys: 5 to 15%. S. valleys: 3 to 8%. N. mountains: 7 to 21%. S. mountains: 5 to 10%.	Variable but mainly from the west at 6 to 12 mph.
Northern California Area Clear.	Inland mid 90s to 105	5 to 15% driest inland valleys	Sac Vly and nearby foothills NW-NE 7-17 mph with gusts 25-35 mph. Lighter elsewhere.
Southern Area No information was reported.			

http://www.nifc.gov/sixminutes/dsp_sixminutes.php

EXTREME FIRE BEHAVIOR (continued)

Extreme fire behavior has always been present in cases of shelter deployment. It is critical for firefighters to maintain situational awareness of live and dead fuel moisture conditions as well as predicted and current weather conditions. As fire behavior changes, it is critical to act decisively to the changing situation.

- Discuss how the following factors can contribute or lead to extreme fire behavior:
 - Frost Kill: Has there been a late or unusually extensive freeze? Is the loading of frost-killed fuels high?
 - Drought Conditions: Live Fuel Moistures Index, KBDI, Soil Moisture Index, low humidity, high temperatures
 - Slope: Increases fire spread uphill, preheats fuels by convection, may channel winds
 - Sea Breeze/Foehn: Wind direction may vary throughout the day, humidity changes may occur, strong wind velocities may drive fire behavior to extremes.
- To aid situational awareness, track NFDRS live and dead fuel moisture outputs.
- Take hourly weather observations and track the hourly changes. By tracking fuel moisture and weather observations and using "Table 74: Fire Severity Related to Fuel Moisture Chart," firefighters can be alerted to those conditions that can lead to situations where there is a high potential for extreme fire behavior.
